

# CAMBRIDGE ROLLER

Proudly Australian Made

The DELMADE Cambridge Roller (or ridge roller) is a heavy duty roller utilising a series of individual cast wheels on a single axle. Each wheel, or roller ring, is shaped in a curved 'V' profile designed to level and break down hard cloddy soil conditions. It is usually used after working the ground with a mouldboard, chisel or disc plough and assists in preparing the ground for the next operation (tyne or disc cultivating). It is also effective after seed sowing to promote seed contact, moisture retention and earlier germination.

## FEATURES

- Heavy duty RHS frame
- 3" HD cast bearings
- Pole stand
- Cast roller rings can be individually replaced

**Larger folding units available upon request**
