

# RING PACKER ROLLER

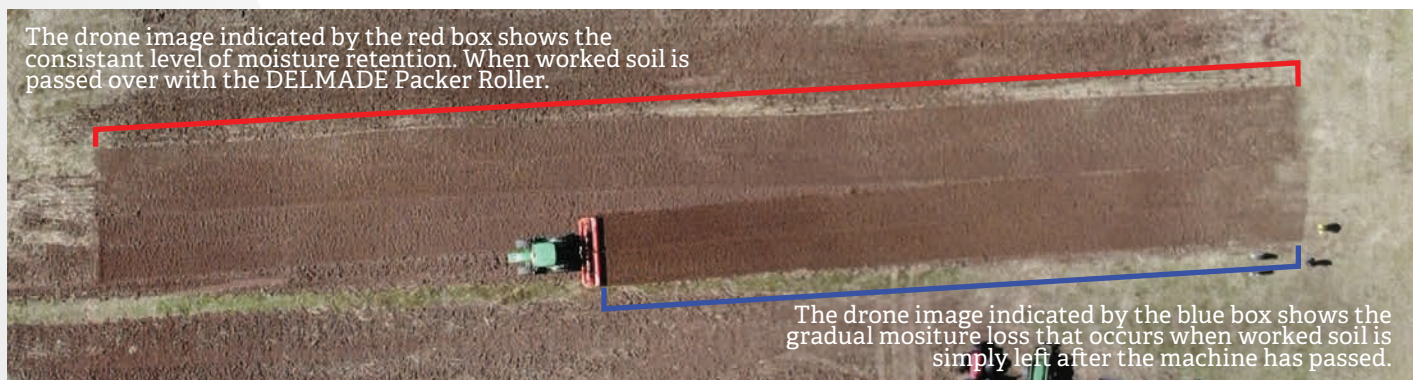

## 3.0M PACKER ROLLER

Proudly Australian Made

The DELMADE packer roller is designed to preserve soil moisture. The machine works by sealing the top few inches of worked soil and is specifically designed to go behind the Offset Disc. The Packer Roller also breaks down large clods giving a level finish and making the second pass more comfortable.

### FEATURES

- Adjustable drawbar, ability to track to left or right
- Cast Rings in V formation
- 2" Axle and 2" Sealed Bearings
- Centre Bearing

The drone image indicated by the red box shows the constant level of moisture retention. When worked soil is passed over with the DELMADE Packer Roller.

The drone image indicated by the blue box shows the gradual moisture loss that occurs when worked soil is simply left after the machine has passed.
