# Berends "S" Tine Cultivators

- Standard Model features a 50 x 12 flat frame with 50 x 50 RHS perimeter frame. The flat section frame allows more vibration throughout the machine giving a better cultivating effect.
- Heavy Duty model features a 50mm x 50mm RHS frame throughout with larger tines, providing a heavier and more ridged machine for hard ground and primary cultivation.
- Adjustable headstock allows machine to be offset for closer cultivation near fences, trees, vines etc.
- Four bar assembly allows approx. 400mm (16") tine clearance which is extremely important in preventing trash build-up.
- Optional crumbler roller breaks down clods and also controls cultivation depth.

Model	Product Code	Weight	Working Width*	Tines	Hp (approx.)	Frame Size
Standard Model	NCU0179		1.2m	12	24	50mm x 12mm Flat
	NCU0180		1.6m	16	32	
	NCU0181		2.0m	20	40	
	NCU0182		2.4m	24	48	
	NCU0183	250kg	2.8m	28	56	
	NCU0185		3.2m	32	64	
Heavy Duty Model	NCU0174		2.4m	16	48	50mm x 50mm RHS
	NCU0175	350kg	3.0m	20	60	
	NCU0176		3.6m	24	72	

\* Actual width of machine is 125mm wider than working width, and an optional wheel kit adds an additional 500mm.

“A simple yet versatile machine that has proven its effectiveness and value over the years”

### OPTIONAL POINTS\*

	Standard Reversible Point	40mm point ideal for nearly all jobs from general cultivation and pasture renovation to mixing in fertilizer.
	Lucerne Point	10mm bimetal blade suitable for cutting into pasture mat to improve productivity. Also used for thinning out wheat fields.
	Goosefoot	70mm share designed to break up very hard ground. Excellent for light stubble cultivation, penetrating couch grass, weed removal and mixing in fertilizer.
	Duckfoot	105mm point which has 100% coverage on standard 'S' tine. Used to quickly spill out weed growth or working previously cultivated ground. Good at cutting of tap roots and mixing in fertilizer

### OPTIONAL EXTRAS\*

Product Code	Product	Benefits / Suits
NCU0184	Pneumatic Dual depth wheel kit	Sizes 1.2m – 2.8m Standard 'S' Tine
NCU0187	Solid Rubber Dual depth wheel kit	Sizes 3.2m – 3.6m Standard 'S' Tine
NCU0177		Sizes 2.4m – 3.6m Heavy Duty 'S' Tine
NCU0178	Tine Helpers	Reduce vibration and fatigue on the tines and minimize tine breakage.
NCU0188/0195	Crumbler Roller	Breaks down clods and is particularly useful in cultivated ground. Can increase speed of operation by up to 30%. Easily removable.

\* At additional cost
